PROFESSIONAL SUMMARY

UX/UI and Product Designer with experience in user research, web audits, interface design and digital experience optimisation. I combine qualitative and quantitative research with the creation of wireframes, prototypes and Design Systems in Figma, connecting user needs with product and business objectives. Trained in AI applied to design, building working prototypes with AI agents.

PROFESSIONAL EXPERIENCE

UX Researcher & UX Designer — Grupo Portillo

Seville | August 2025 – July 2026 | Full-time — Web Audit, UX Redesign & Marketing Strategy

- Audited the company's sales and rental website across information architecture, usability, navigation, conversion and SEO, identifying 10 critical issues, quick wins and a prioritised improvement roadmap.
- Designed the website redesign proposal, including a simplified navigation structure, a task-based homepage and wireframes.
- Conducted user research through interviews, surveys and usability testing, presenting findings and recommendations to stakeholders.
- Developed marketing plans for client acquisition, product sales and social media, including a four-week campaign ahead of the Seville Fair to drive sales, reservations and leads.
- Devised a strategy to attract high-value clients through a private 20-guest event, defining the concept, guest selection, venue comparison and post-event follow-up.

UX Designer — Green Hat Workers

Remote | January 2026 – July 2026 | Master's Internship — Digital Strategy, Branding & AI

- Audited more than 10 websites, including a multi-site audit for a trade union, combining information architecture analysis, heuristic evaluation, severity ratings and prioritised recommendations.
- Benchmarked 5 web design services and designed the structure and wireframes of a conversion-focused landing page for a standardised corporate website offer.
- Conducted user research through interviews, surveys, usability testing, card sorting and tree testing; synthesised findings into personas, customer journey maps and affinity maps.
- Redesigned websites and digital experiences, creating user flows, wireframes, interfaces and interactive prototypes in Figma and Adobe XD.
- Created and maintained Design Systems in Figma, alongside branding and visual identity work.
- Created content for YellowBreak, the company's digital magazine, and audited its website.

User Research & Information Management Intern — Andalusian Prader-Willi Association

Andalusia | October 2024 – March 2025 | Degree Internship

- Built a member database and conducted user research through interviews, surveys and questionnaires to understand members' experience, managing information from more than 50 users and families.
- Produced reports and conclusions with longitudinal follow-up, and created content for the association's website.

Operations & Process Analyst — Massoluciones

Seville | August 2018 – August 2020

- Analysed and improved administrative workflows; developed internal manuals and procedures.
- Managed contracts, quotations and invoicing for a portfolio of more than 50 active clients.

SELECTED PROJECTS

- **MASSolisapp (real client, 2026 – Present):** Research, UX and UI for a web panel, mobile app and client portal replacing Excel and WhatsApp; interviewed 10 professionals and the CEO and built a working prototype with AI agents.
- **Cecotec app (Master's Thesis, team of 3, 2026):** Led the UX research and WCAG 2.2 audit, and built the interactive simulation of its virtual assistant and AR; usability tested with 7 participants.
- **Oh My Cat! (Master's project, 2025–2026):** Research, rebranding and responsive redesign of a cat café website, with a working booking prototype.

EDUCATION

- Master's Degree in User Experience (UX) Design — UNIR | 2025–2026
- Advanced Programme in Artificial Intelligence Applied to Design — UNIR | 2025–2026
- Bachelor's Degree in Social and Cultural Anthropology — University of Seville | 2021–2025
- Additional Training: InDesign, Illustrator and Photoshop · Design Thinking and Scrum · WordPress · SEO
